

# Makerspace FLC: Project Examples

## GEOL101L: Planet Earth

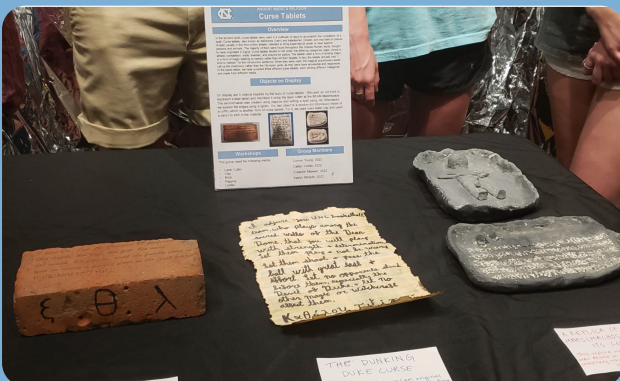

Students designed and made experimental models that they could use to collect data on geological phenomena.

## EDUC567: Postmodern Children's Lit.

Students designed and made alternative-format children's literature (e.g. a collection of objects that tells a story.).

## CLAS59: FYS: Ancient Magic Religion

Students designed and made new interpretations of ancient artifacts that incorporated personalized themes.

## BIOL064: FYS: Modeling Fluid Flow

Students designed and constructed models that they could use to observe flow through and around organisms.
