

SAWZALL

Quick Guide

Safety:

1. This tool has an exposed blade. Keep hands out of your work space at all times.
2. Always shut off tool when blade is not actively cutting.
3. Ensure no part of your body will be in your cut path.

Set-Up:

1. Securely clamp and support material to be cut. Note: Material should be secured based on where you feel comfortable holding the saw.
2. Adjust blade to suit material and desired cut.
3. Plug in sawzall, ensuring power cord is clear of underneath and around your work.

Use:

1. Position the saw near the start of your cut path, but not touching your material.
2. Turn on the saw and allow blade to reach full speed before starting your cut.
3. Once desired cut length is achieved, turn off the saw. Allow blade to fully stop before removing it from your material and unplugging the saw.
