

# BeAM Maker Courses

## Mini-Grant Guidelines

Are you integrating the BeAM makerspaces into your course?  
Do your students need access to specific maker materials?

**Apply to receive a stipend for your maker-integrated course!**

Fall 2021 deadline: **October 1st, 2021**

Spring/Summer 2022 deadline: **January 1st, 2022**

Funds must be used to purchase **consumable materials that students will use in the BeAM makerspaces.**

Funds awarded based on **maximum course enrollment:**

- **0-25 students:** up to \$100
- **26-50 students:** up to \$150
- **50+ students:** up to \$250

Appropriate **materials** include items **not stocked** in BeAM:

- **General:** craft supplies, jewelry notions, fabric, circuits, etc.
- **Laser Cutter:** plywood, acrylic, fabric, paper, felt, etc.
- **3D Printer:** various types of filament – colors, flexible filament, etc.
- **Don't feel limited to this list** – your proposal can include other materials that aren't mentioned above, but funded materials must be used with tools in the BeAM makerspace.

Questions to consider in **your application:**

- How does the proposed maker project support your course goals?
- How will the proposed materials impact the maker project?
- How will you support students in using the proposed materials?
- How will you know whether the maker project is helping students learn the course content?
